- Two solutions for fire- and theft-protected hard drives
 - MVHD-250 includes a 250 GB† Seagate Momentus® 5400.4 hard drive*
 - MVHD-500 includes two 250 GB† Seagate Momentus® 5400.4 hard drives* (500 GB† total capacity)
- Industry-leading UL® 125° F 1-Hour Fire Rating
- Rapid on-site access to information in the event of a fire
- Key lock for protection from physical theft
- 4' twin-lead USB cable included, allowing for more placement options
- Includes third-party backup software**
 - Network capable
 - MS Windows compatibility
 - AES 256-bit encryption
 - Easy-to-use interface
 - Disaster recovery
 - Multi-drive spanning
 - Program settings and preferences backup
- Nationwide sales and service support

* Compatible with Mac or PC.
 ** Compatible with Windows only.

† When referring to hard drive capacity, one gigabyte, or GB, equals one billion bytes. Your computer's operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions and will not be available for data storage.

THE BEST FIRE PROTECTION. UNMATCHED DATA DEFENSE. FIREKING® STRONG.

CONVENIENCE. CONFIDENCE. PRESERVATION. PROTECTION. THAT'S MEDIAVAULT™ HD.

MEDIAVAULT™

How Safe Is Your Critical Data?

Can it withstand a fire? Can you access your data in the event of an emergency? You can't afford to gamble on the security of your data. Nobody understands that better than FireKing. That's why the industry leader in vital records protection brings you the latest in secure external hard drive data storage - MediaVault HD.

UL® Class 125 Fire Rating - 1700° One-Hour Fire Test.

External hard drives are sensitive to heat. So much so, that the leading manufacturers clearly state the maximum temperature not exceed 158° Fahrenheit. That's why FireKing has put the MediaVault HD through Underwriters' Laboratories® Class 125 fire test and earned this prestigious label. No other product on the market comes close to this rating. In fact, the closest competitor can do no better than a 350° F rating. Our proprietary insulation material is the secret to not only maintaining this temperature in a one-hour 1700° F fire test, but guaranteeing the relative humidity never exceeds 80%.

Stay In Control With On-Site Protection.

Your most important data is stored on-site and puts you in complete control. It's not stored online or off-site where the chance of your data being stolen or otherwise compromised is a real risk.

On-Site Recovery.

In the event of a disaster, FireKing gives you the ability to access your drive and its information right away. Unlike competitive solutions, there's no need to send your hard drive to a third-party lab to salvage your data where it is exposed to untold risks. Data recovery time is only limited by how fast you can open the MediaVault HD, grab your drive and connect a USB cable to a computer.

A Three-Year Limited Warranty.

Your MediaVault HD is easy to use and tailored to run on PCs, Macs or small networks. It's designed to be up and running in minutes, ready to be put to work with the click of a mouse. MediaVault HD enclosure and included external hard drives are backed by FireKing's three-year limited warranty.

4' Heavy-Gauge USB Cable Included

Two Models To Choose From.

Choose from two storage solutions for your MediaVault HD:

1. MVHD-250, includes a single 250 GB† Seagate® Momentus® 5400.4 hard drive
2. MVHD-500, includes two 250 GB† Seagate® Momentus® 5400.4 hard drives

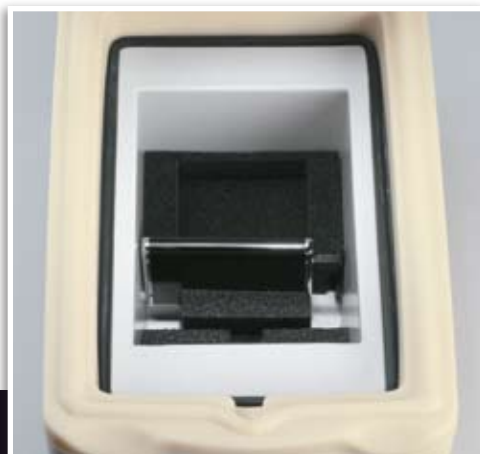

MVHD-500 with Dual Exterior Ports

Backup Software Included.

For those looking for a feature-rich backup software solution, MediaVault HD includes a total system and data protection software solution with the power, flexibility and features to suit single system users or multiple systems within small businesses over LANs. Customize and update settings so your data is constantly backed up, giving you up-to-date data in the event of disaster.

Get Full Protection.

The fact of the matter is: if you're not using a MediaVault HD for your data backup, you're still vulnerable. **You need your data and you need it protected.**
