Vending

- Turn VEND key to ON position (CW).
- Press the numbered button for the column desired.
- Rotate the release knob for the selected column.
- Collect your tube of change from the dispensing tray.
- Tube count automatically subtracts tubes as they are vended.
- The vend delay must be satisfied before you may vend again.

ALT VEND Mode

- Turn MGR key to ON position (CW).
- Press the ALT VEND button.
- The screen will indicate ALT VEND. While in this mode the vend delay is 30 seconds regardless of the normal value.
- To switch back to the normal vend delay press the ALT VEND button with the MGR key in the ON position (CW).

Loading Tubes

- Open outer door (see Door Operation – Normal Access).
- Insert the tubes into the columns.
- While screen says “Loading Tubes?” press the DOOR button to edit the tube inventory.
- Press the number button corresponding to the first column you are loading.
- Enter the new tube inventory for that column using the number buttons. Use button “10” to enter a “0.” Enter two digits for number 10, 11 or 12. Only entries of 00 to 12 are accepted.
- Press the DOOR button, then press the next column number and enter the new inventory amount; repeat until all columns are updated.
- Press ALT VEND to exit the tube inventory update mode.
- Close the door to return to normal operation.

Checking Tube Count

- Turn MGR key to OFF position (CCW).
- Press the DOOR button.
- The screen indicates the number of tubes in the first five columns for several seconds, then shows the last five columns.
- Do a physical tube count any time by opening the door and looking at the view slots.

Manual Drop

- A manual drop drawer is provided for making secure drops of cash.

Door Operation – Normal Access

- Insert MGR key and turn to ON position.
- Press the DOOR button.
- The DELAY/READY indicator will turn red indicating the delay cycle is in progress.
- The MGR key may be removed during the delay cycle.
- At the end of the door delay cycle both LEDs will switch to green.
- Insert MGR key and turn to ON position.
- Press the DOOR button.
- The DOOR indicator will go off.
- IMMEDIATELY turn the handle and open the outer door.

Door Operation – Armored Car Access

- Insert and turn the ACO key.
- IMMEDIATELY turn the handle and open the outer door.

Programming

- Vend delay and door delay times are set with a DIP switch on the main circuit board. The factory defaults are 2 minutes vend delay and 10 minutes door delay. To modify these settings contact McGunn Technical Support at 1-800-452-4655.

Specifications
