

Introducing the most affordable Dispensing and Validating Safe on the market.

**McGunn  
Safe**

**Easy120V**

IT'S ALL THE VALIDATION YOU NEED  
TO UPGRADE YOUR DISPENSING SAFE.

Easy120V Open View

Moving up to a Validating Safe is usually an expensive investment, but that's now a concern of the past with the arrival of McGunn's Easy120V. Designed to offer greater efficiency and flexibility, the Easy120V truly stands apart from the competition. Just like the recently introduced McGunn Easy120, the Easy120V offers a 36% increase in tube capacity (120 versus the traditional 88). The Easy120V also offers easy-to-use bill validators, which means this stand-alone safe accurately counts all denominations of money, rejects counterfeit bills, reduces bank fees and cash-handling time, and tracks who's making how much of a deposit and when. There's no doubt about it – at this low of a price, the Easy120V is the best cash-handling solution available within the c-store arena.
