FireKing® Turtle

Big Protection in a Compact Size. Perfect for Home or Small Business.

The new FireKing Turtle File offers full-scale protection in a small, economical size that's ideal for home, personal office or small business. It meets the same UL® Class 350 1-hour Fire and Impact rating as FireKing's larger models, and offers quality FireKing features including: scratch-resistant, powder coated

finish; heavy-duty, telescoping, all-bearing drawer suspensions; field replaceable exterior steel panels; standard key lock.

The FireKing Turtle File is equipped for A-4 filing (front-to-back) or for foolscap or legal-sized filing (side-by-side). Available in platinum (light gray).

FireKing Turtle Specifications

RECOMMENDED FILING ARRANGEMENTS FOR 2- AND 4-DRAWER VERTICAL FILES

Fire and Impact Rating

The FireKing Turtle's Underwriters Laboratories® "Insulated Records Container" classification includes a one-hour fire test of 1700° F (926° C), an explosion hazard test and a 30-foot impact test.

Insulation

The FireKing Turtle's casting is of 100% gypsum insulation, dried in a low-temperature oven to reduce free moisture to less than 1/2%. Insulation is reinforced with 14-gauge galvanized welded-steel wire; and insulation between all drawers makes each drawer a separate insulated container.

Steel Panels

All exterior FireKing Turtle steel panels are replaceable in the field in the event of minor damage.

Finish

An electrostatically applied powder coating makes for the FireKing Turtle's superior scratch, scuff and stain resistance. Plus, a five-stage pre-finishing treatment is provided for unmatched adhesion and rust resistance.

Drawers

Suspension: A precision ball bearing telescoping suspension, bayonet-mounted to each drawer body, is securely mounted with screws to metal posts in the FireKing Turtle's file body.

Drawer Bodies

Each FireKing Turtle drawer body is built with high sides for use with hanging folders – no additional frames are required. Drawers are suitable for both A-4 and foolscap/legal-sized filing. For A-4-sized documents, use a front-to-back filing method; for foolscap/legal-sized documents, use a side-to-side system.

Drawer Heads

FireKing Turtle drawer heads are formed of welded steel and filled with gypsum insulation. The drawer heads are designed for a tight interlock with the cabinet frame – making the drawers extra-resistant to heat transfer.

Drawer Lock

A four-pin keylock provides general locking of all FireKing Turtle drawers.

Drawer Bypass

Works for all FireKing Turtle drawers. In its "up" position, a two-position drawer catch allows that drawer to stay unlocked while all others remain locked.

Drawer Pulls

Recessed for better space utilization.

Free Replacement Guarantee

If your FireKing Turtle is ever required to protect your information in a fire, we will replace your FireKing Turtle free after it's done its job if any damage has occurred to its exterior.
