

**FOR IMMEDIATE RELEASE:**

## ***Image Vault Marks 10 Years: Proving the Business Value of DVRs***

**New Albany, IN and Chicago IL (NACS Show, October 4, 2008)** – Since 1998, when Image Vault developed a digital product that was a plug-and-play replacement for the VCR systems prevalent at the time, its solutions have been proven successful in many numerous c-store applications nationwide. This year, Image Vault - the leading provider of end-to-end digital video security solutions to the c-store industry - is proud to mark its 10-year anniversary.

A history dating back a full decade demonstrates a staying power that very few of the company's competitors have been able to match. At the same time, Image Vault has lost none of its entrepreneurial drive, and has continued to innovate. Just recently the company announced the release of the latest upgrade to its Image Vault product suite with Image Vault Software Version 9.3.0

"The past ten years has been very exciting time as we've witnessed how much the changeover to DVR technology has transformed c-stores' ability to protect their assets," said David Goffinet, Image Vault's Senior Vice-President & COO. "With our focus on innovation and product development, Image Vault has been at the forefront of this evolution, and we are very proud of what we've been able to accomplish."

Image Vault nearly eliminates the opportunities for internal theft, increases life safety, and decreases under-age sales of tobacco and alcohol. The simple management and ease-of-use of Image Vault allows store managers to view hours many worth of footage in a given timeframe - usually in less than half the time it takes with a VCR-based system, enabling store managers to devote resources doing on the floor supervising employees and helping customers.

From the largest chains to single stores, whatever the need, Image Vault has a solution made to order. Standalone or networkable with cash registers, safes, door alarms; one camera or hundreds - Image Vault DVRs have exactly the features any c-store business needs, in just the right combination.

Image Vault version 9.3.0 was released May 1, 2008.
