

NKL[®] Edge and Edge PLUS

NKL Edge

- The first cash management platform to work directly with your accounting system
- Connect remotely using an external Ethernet/RS-232 device or external modem
- Export data from your NKL units
- View, format and print data into various reports from your PC, including
 - Complete (or custom filtered) audit trail history
 - Cash on hand
 - Current or past end-of-day and deposit reports
 - User shift reports
 - A report listing enrolled users
 - System hardware component list
- You choose whether to connect manually, or allow your PC to automatically connect and obtain report data according to a predetermined schedule
- Further process the data with Microsoft[®] Access[™], Excel[™], or other popular spreadsheet/database managers
- Ledger entries, balance sheets, graphs, charts and histories
- Gives you a clear, concise account of your money every minute of the day

NKL Edge PLUS

- Includes all NKL Edge features
- Handle administration remotely from your PC – add or delete users, configure all the units in your network

The Smarter Way To Handle Cash
